MODULE: SYLLABUS DESIGN LEVEL: MASTER II

SEMESTER ONE TEACHER: DR. SAIHI H.

## Lecture III: Needs analysis and ESP curriculum

Gathering information about learners and about communication tasks for use in syllabus design. **Needs analysis** (also known as needs assessment) has a vital role in the process of designing and carrying out any language course. The purpose of need analyses is to identify the gap between: what students are able to do and what they need to be able to do.

# 1. Needs analysis ???

Needs can be:
necessities ( what
learners has to know),
lacks ( what learners
doesn't know), wants (
what learners think
they need to know)
We collect
information about the

learners needs through questionnaire , interview , observation, tests, case studies , learner diaries .

> Situation analyses : ( environment analyses)

Need analysis was introduced into language teaching through ESP movement.

> Needs: requirements, demands, expectations, constraints.

There are high scale needs and low scale needs

**Hutchinson and Waters (1987: 53)** argue that any language course should be based on needs analysis. Needs analysis is fundamental to an ESP/EAP approach to course design. Many ESP scholars suggest that TSA (Target Situation Analysis) and PSA (Present Situation Analysis) are the fundamental components for assessing language needs of learners.

# 2. Components of Needs Analysis

#### Target Situation Analysis (TSA):

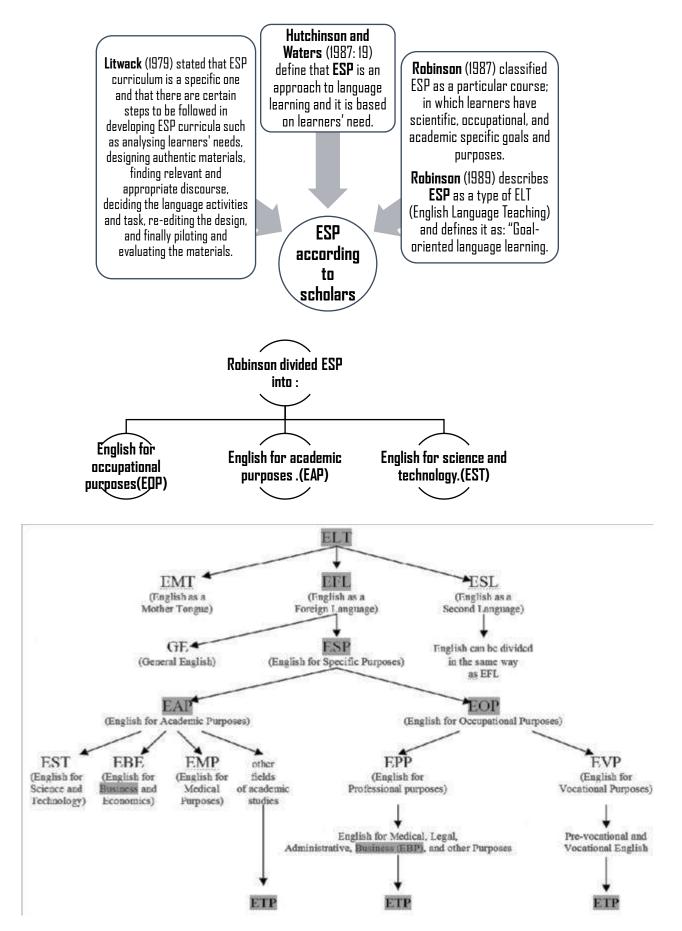

The term, 'Target Situation Analysis' (TSA) was introduced by Chambers (1980). Target Situation Analysis (TSA) is a form of needs analysis, which focuses on identifying the learners' language requirements in the occupational or academic situation they are being prepared for. Robinson (1991: 8) argues that a needs analysis, which focuses on students' needs at the end of a language course, can be called a TSA (Target Situation Analysis).

#### Present Situation Analysis (PSA):

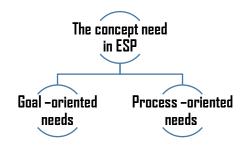

According to Robinson (1991: 8), "PSA (Present Situation Analysis) seeks to establish what the students are like at the start of their language course, investigating their strengths and weaknesses".

### 3. ESP development

Since 1960s, English for Specific Purpose (ESP) has been progressively growing and has eventually come to play a major part in English Language Teaching (ELT). **ESP Curriculum**Development is basically the process of planning and implementing a certain curriculum; in the same way a language curriculum is regarded as the various tasks and materials combined in one design.

Tree diagram: ELT and assumptions about the place of ETP(s) within ESP (Tonić, 2010)

Necessities: what learners must know? Lacks: what learners doesn't know. Wants: what learners feel they need.

#### 4. Major factors affecting syllabus design

1. Social factors : [community and society 'business, politics, parent, citizen']

- Is there suitable classroom?
- Is there enough time?
- Are there enough resources?
- Learners factors: [backgrounds, believes, expectations, learning styles]
- How old are they?
- What do they know?
- What do they want (preferred way of learning?
- 3. Teachers factors: [language proficiency, experience, skills qualities, teaching styles and strategies]
- Are they trained?
- Are they confident?
- Do they have time to prepare?

#### 5. What should be incorporated in the syllabus?

- Selection and gradation (what to teach, in what order)
- *Teaching method* to achieve this purposes.
- For what *purposes*?
- What standard of achievement to be attained
- What information about the learners.
- How to test. (Hutchinson and Water, 1987)
