Level: First year Master

Lecture 07: An overview of Bank Sector

This Lecture is To enable the Student to:

- Understand the features of Banking Sector
- Know the significant contribution of different types of banks
- Appreciate how important banking services for the economy

1-Origin of Bank:

According to some writer the word „Bank“ was derived from „Banco“, „Bancus“, „Banque“ or „Banc“ all of which mean a bench upon which the mediaeval European Money-lenders and Money – Changers used to display their coins. In the Mediaeval age Italian states were sound and solvent economically and commercially. At that time a group of people used to conduct business of transaction of money sitting on a stool or bench which was replaced by „Banco,“ „Banko“ „Banca“, „Bangk“, „Bancus“, „Banc“ etc. It is assumed that the word „Bank“ was originated from these words.

2-Definition and Characteristics

Banks are the important segment in any economy, especially Financial System. An efficient banking sector helps the nation's economic development. Various categories of stakeholders of the Society use the banks for their different requirements. Banks are financial intermediaries between the depositors and the borrowers. Apart from accepting deposits and lending money, banks in today's changed global business environment offer many more value added services to their clients. The Central Bank of the country plays different roles like the regulator, supervisor and facilitator of the economy's Banking System. In general terms, banks make profits by selling liabilities with one set of characteristics (a particular combination of liquidity, risk, size, and return) and using the proceeds to buy assets with a different set of characteristics. This process is often referred to as *asset transformation*. For example, a savings deposit held by one person can provide the funds that enable

the bank to make a mortgage loan to another person. The bank has, in effect, transformed the savings deposit (an asset held by the depositor) into a mortgage loan (an asset held by the bank). Another way this process of asset transformation is described is to say that the bank “borrows short and lends long” because it makes long-term loans and funds them by issuing short-dated deposits. The process of transforming assets and providing a set of services (check clearing, record keeping, credit analysis, and so forth) is like any other production process in a firm. If the bank produces desirable services at low cost and earns substantial income on its assets, it earns profits; if not, the bank suffers losses.

3- Functions of Commercial Banks

These functions can be divided into two parts:

- (a) Major functions
- (b) Other functions/ancillary services

(a) Major functions:

- (i) Accepting Deposits
- (ii) Granting Advances

(b) Other functions:

- (i) Discounting of bills and cheques
- (ii) Collection of bills and cheques
- (iii) Remittances
- (iv) Safe custody of articles
- (v) Safe Deposit Lockers
- (vi) Issue of Letter of Credit

Besides the above functions, Banks now-a-days associate themselves in the following activities also either by

opening separate departments or through separately floated independent subsidiaries:

- (i) Investment Counseling
- (ii) Investment Banking
- (iii) Mutual Fund
- (iv) Project Appraisal
- (vii) Issue of Guarantees
- (v) Merchant Banking Services
- (vi) Taxation Advisory Services
- (vii) Executor Trustee Services

- (viii) Credit Card Services
- (ix) Forex Consultancy
- (x) Transactions of Government Business
- (xi) Securities Trading
- (xii) Factoring
- (xiii) Gold/Silver/Platinum Trading
- (xiv) Venture Capital Financing
- (xv) Bankassurance - Selling of Life and General Insurance policies as Corporate Agent
