

Module: Project workshop 4

Exercise N° 01:

Housing typologies (Presentation)

Work required : In order to identify the different typologies of housing, the student is required to do a theoretical research on the following elements:

1- Individual grouped Housing (Habitat individuel groupé)

- Definition
- Evolution and history
- Characteristic
- Advantages and disadvantages

2- Collective Housing (Habitat collectif)

- Définition
- Characteristic
- Advantages and disadvantages
- Typologie
 - Mode of distribution : vertical (stairs, elevator), horizontal (corridor, courssive),.....
 - Mode of implantation : molecular, linear, annular, combined

3 - Semi-collective Housing (Habitat intermédiaire)

- Definition
- Evolution and history
- Characteristic
- Advantages and disadvantages

4- Spheres of activities

- The interior space of the apartment (L'espace intérieur du logement)
- The surroundings of the apartment (L'entourage du logement)
- The neighbourhood's public space (L'espace public du quartier)

Rendering : Two weeks from the start of the exercise

Evaluation mode: It is in the form of a display whose score will be estimated at a percentage on work of 10%. And with a weighting coefficient (1).
