## Before download starts

Our software is, and always will be, available free of charge if downloaded from QGIS.org.

The project is a result of a huge effort and social contribution from many community members who volunteer their time and expertise. In addition, many businesses, government agencies and commercial entities have contributed to the development of QGIS. They do this either to ensure that QGIS meets their specific needs or to contribute to and accelerate the huge social impact that is realised by making a tool such as QGIS freely available. Our goal is the betterment of society through informed spatial decision making. If you are able, we gently request that you support our work.

Whether you choose to donate or not, we hope that you enjoy using our labour of love and encourage you to share and spread your downloaded copy far and wide so that others may enjoy it too.

Our very best regards!

Donations to QGIS might be tax-deductible in some countries. Please refer to your local tax office for details. If you want to tax-deduct as a German company

One-Time Monthly

€ 10.00 € 20.00 € 50.00

€ 100.00 € 250.00

The long-term builds currently provide 3.40.15 'Bratislava'. Long Term Release (LTR) builds are intended for those who value stability over having the latest features. If you are unsure which version is best for you, download the LTR.

QGIS is available on Windows, macOS, Linux, Android and iOS.

We are currently in feature freeze preceding the release of QGIS 4.0. **Please consider testing the prereleases.** See [road map](#).

## Windows

### Online (OSGeo4W) installer:

[OSGeo4W Network Installer](#)

This installer is the **best way to keep QGIS up to date**, run multiple versions on your system and keep the load on our download servers to a minimum. [Learn more.](#)

### Offline (Standalone) installers:

[Long Term Version for Windows \(3.40 LTR\)](#)

[Latest Version for Windows \(3.44\)](#)

These installers are for users who wish to easily share the download e.g. putting it on a USB key or network share. [Learn more.](#)

 Since QGIS 3.20 we only ship 64-bit Windows executables.
