Work N° 05: Importance, Objectives, Justifications, and Research Boundaries.

Part 1: Importance, Objectives, and Justifications

1. Define the Importance of the Research:

Highlight the value and potential contributions of your study. You must provide:

- Theoretical Importance (Scientific).
- Practical Importance (Applied).

2. Set the Research Objectives:

Formulate at least three specific goals you intend to achieve by the end of your study.

3. Provide Justifications for Topic Selection:

Explain the specific reasons that led your team to choose this particular topic. Provide:

- At least one Subjective Justification.
- At least two Objective Justifications.

Part 2: Defining Research Boundaries

To ensure your study is focused and manageable, define the following boundaries for your research:

- Conceptual (Subject) Boundaries.
- Spatial (Geographical) Boundaries.
- Temporal (Time) Boundaries.
